### FISHING INFORMATION ON BULL SHOALS LAKE

Fishing in the Bull Shoals area is good year 'round in one way or another. Because of our location we are only minutes away from prime fishing on either Bull Shoals Lake or the world famous White River.

Whether your preference be bass, crappie, walleye, white bass, trout, panfish, or all of the above, at some time of the year we can accommodate you, your friends, and family. If on your stay, catching on the lake slows down, you can always modify your plans to fish for trout on the White River or, if you have come to fish the White River for trout and would like to try something different, may we suggest a fishing trip for bass on the lake?

A suggestion we make to all of our customers is: when coming here for the first time, forget everything you have ever learned about fishing. Truly, fishing the crystal clear waters of the Ozark Mountains is unique to this area alone. We recommend for river fishing an ultra light to a medium-action rod and reel, 4 to 6 lb. line maximum. For the lake, light to medium heavy with 6 to 10 lbs. test is best. Better yet, just bring one light and one medium action combination. As far as line and tackle, why not just wait until you are here since conditions may change overnight. The friendly staff and guides at the boat dock will be happy to advise you on the right line test and the best choice of bait when you arrive.

If you are a beginner, a weekend fisherman, or an expert, your fishing vacation in Bull Shoals can provide a lot of fun and memories you will not soon forget.

One more tip...we would like to suggest that you take a guided fishing trip, either on the lake or White River, or both, when you first get here. The education you will receive about fishing in the Ozarks will be well worth the investment.
